EDUCATION

University of California, Irvine

Bachelor of Science: Computer Science with specialization in Intelligent Systems

- **Major (CS) GPA:** 3.697
- **Dean's Honor List Recipient** (Spring 22', Fall 22', Spring 23', Fall 23', Spring 24')

Irvine, CA

Expected June 2025

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL (Postgres/MySQL), Node.js, HTML/CSS, C/C++

Frameworks: REST API, JWT, NestJS, Angular, Redis, Socket.io, Angular Material

Developer Tools: Git, Docker, VS Code, GCP, SSH, PM2, Postman, Netlify

EXPERIENCE

Software Developer Intern

June 2024 - September 2024

Corover.AI

Remote

- Enhanced chatbot functionality for the **eSevak bot** (10M+ users) by implementing input validation against prior response objects and a chat-reset functionality with **Redis**, ensuring deletion of appropriate key-value pairs.
- Assisted in cloud service migration from **Linode** to **Google Cloud Platform**, deploying 10+ services using **SSH**, **PM2**, and **Git**, gaining hands-on experience in cloud infrastructure.
- Collaborated with a team to perform **use-case testing** on a high-priority chatbot for University Living (7M+ bookings), just before its launch, identifying and prioritizing critical UI/UX, backend, and data issues to enhance platform performance for.

Systems Software Engineer (Software Architect)

April 2023 - September 2023

CubeSat

Irvine, CA

- Worked in a cross-functional team in the successful design of software systems, **enhancing system efficiency** by 20% through optimizing documentation workflows and standardizing the organization of project requirements.
- Collected system requirements from CubeSat projects across **US universities** and developed UML diagrams, improving **system clarity and alignment** with project objectives.
- Collaborated with **Northrop Grumman** and team members to refine software requirements and adopt **agile methodologies**, accelerating project timelines and enhancing adaptability.

PROJECTS

Fullstack Realtime Chat Application

August 2024 - September 2024

- Developed a fullstack realtime chat application using **NestJS** and **Angular** with **Socket.io** for bidirectional communication and **JWT**-based user authentication.
- Built **REST APIs**, **structured** backend with controllers, services, DTOs, validators; implemented chatroom features and user management.
- Integrated **Angular Material UI**, connected frontend and backend sockets, and tested APIs using **Postman**.
- **Containerized** both backend and frontend services using **Docker** gain hands-on experience with containerization.
- [GitHub Repository](#)

Task Management Backend Service

July 2024 - August 2024

- Designed and implemented a backend service for task management with **JWT**-based custom auth guards, supporting **CRUD** operations for tasks, **filtering**, and **searching** by status, date range, and user.
- **Developed** user authentication, task creation, status updates, profile management, and ensured data validation and secure API endpoints.
- [GitHub Repository](#)

Webscraping Search Engine

April 2023 - June 2023

- Developed a tailored web **search engine** for a given set of web pages, enhancing search accuracy and speed by 40% through pre-processing and indexing files, allowing for faster retrieval of results using Python, Flask, and BeautifulSoup..
- Improved search relevancy using **TF-IDF scoring** and **NLTK** for advanced tokenization and stemming.
- Integrated **OpenAI's GPT-3** via API to generate concise search summaries, elevating user experience by providing quicker and more accurate search results.
- [GitHub Repository](#)

Portfolio Website (FullStack)

April 2024 - May 2024

- Engineered a **fully responsive personal portfolio** website using HTML5, CSS3, and JavaScript, ensuring optimal performance across devices and browsers.
- Implemented a **dynamic contact form with email functionality** using JavaScript's EmailJS Framework.
- Integrated media queries to ensure **compatibility and responsiveness** across various screen sizes.
- Utilized Netlify for **continuous deployment**, ensuring efficient version control and easy updates.
